The Redaction Tool Most Trusted by Professionals

State of the Art, COTS Redaction Solution

RedactXpress is a stand-alone redaction and declassification tool used to withhold information from documents. It eliminates tedious manual labor, copying, tracking documents and filing.

Irreversible Redaction After Burn-in

Unlike solutions that merely hide the information under black bars, RedactXpress completely and securely removes information that you select for redaction. It parses the document, physically deletes the selected information, and generates a new redacted document. RedactXpress includes built-in and customizable exemption codes for FOIA and the Privacy Act

The deleted information cannot be recovered because the redacted file is created without it. This includes permanent deletion of sensitive content from PDF documents.

Broad Range of Redaction Requirements

Redaction has applications in government, the court system and many regulated industries. For instance, the Freedom of Information Act (FOIA) mandates public access to many documents as long as sensitive content is not disclosed. RedactXpress streamlines compliance with the Freedom of Information Act (FOIA), Privacy Act, Health Information Portability and Accessibility Act (HIPPA), and the Openness in Government Act of 2005.

Who Should use RedactXpress?

- U.S. Federal Government Agencies
- U.S. State and Local Governments
- Government and Law Enforcement Agencies Outside the United States
- Government Contractors and Consulting Firms
- Pharmaceutical Companies
- Health Care Providers
- Law Firms and Litigation Support Companies
- Corporate Human Resource Departments

Discover why RedactXpress is a "cut above" all the rest :

- Works in standalone mode or integrated with FOIAXpress
- Adaptability with ADX Files - can be imported into FOIAXpress application for review and delivery to requester
- Can be associated to open TIFF documents
- Tracks FOIAXpress request metadata
- Ability to create new documents
- Performance of image operations (Image Scaling Operations)
- Capability to apply/edit/remove redactions
- Redaction using polygon or rectangle tools
- Original documents never altered
- Multiple redaction layers capture entire review process
- Transparent, translucent, or opaque views
- Add comments to any redactions
- Insert exemption codes directly into redacted area
- Move exemption codes to margin

- Insert background/foreground colors
- Redact page in full
- Set font size and style of exemption codes
- Bring Front/Send to Back for multiple layer redactions
- Ability to edit TIFF documents using various tools (comment boxes, straight line, stamps, sticky notes, highlight, ellipses)
- Line tool
- Highlight tool allows reviewers to highlight text/picture area on TIFF documents
- Notes tool to track changes
- Comments tool to provide annotations
- Stamps -- Various predefined stamps and custom stamps
- TIFF compression
- . doc, .xls, .rtf, .ppt, pdf, .wpd, .vsd documents are converted to .tif images with our converter for redacting purposes
- Ability to save documents in TIFF/PDF formats
- The sanitization of the documents or "burn-in" allows user to identify which redaction object are burned in and which are left visible to the recipient
